

“BAD ROADS” - « *We are not afraid of bad roads!*»

BAD ROADS [®] (***BR*** [®]) is a product line of auto parts with enhanced operational characteristics.

- *The specially formulated composition of the rubber compound with improved tensile properties increases the service life of the product;*
- *Implemented well-engineered design improvements;*
- *Individual approach to each product development, which is adapted to the severe in-service environment in off-road conditions, is aimed at satisfying consumer requirements*

BC0104 “BAD ROADS” [®] ”

Before

Critical areas of elastomer destruction are eliminated.

The outer diameter and edge thickness are increased.

The inner diameter is reduced (works perfectly for lever arms with a long service life).

After
“NEW” BC0104
