

MOUNTING AXLE BEAM (PLASTIC), REINFORCED "BAD ROADS"

BC11031

www.bcguma.ua/auto/BC11031

Article:	BC11031
Numbers of other manufacturers (OEM):	8200034395; 8200626965; 8200734588
Weight, g:	394
Required amount:	2
No. of items in Package:	2
External diameter, mm:	54.3
Inner diameter, mm:	17.0
Thikness, mm:	78.5
Material:	Polyamid / rubber/ metal
Installation axis:	Front
Fitting Position:	Left / Right

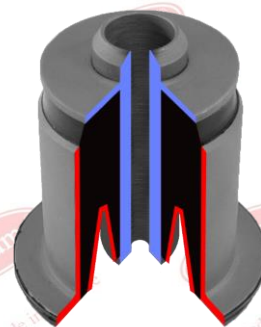

APPLICABILITY:

RENAULT, OPEL, NISSAN, VAUXHALL

Advantages of Silentblock BC11031 "BAD ROADS" In comparison with other manufacturers:

1. The external holder of the silentblock is made of a polymeric material, which is equal in its characteristics to soft metals ;
2. For a more dense unlocking, the outer diameter and the wall thickness of the part were increased;
3. Structurally, the critical sites for the destruction of elastomers are eliminated;
4. A special composition of the rubber mixture was developed;
5. Thanks to these changes, the service life of the silentblock has been increased.
